the tools you need to unlock the power of fat
Tulip Gold Standard Injection Sets

Considered by surgeons worldwide to be the ideal sets for successful fat re-injection: Advanced Harvesting = Successful Outcomes
Tulip’s Gold Standard Injection Sets feature our exclusive, patent pending, CellFriendly Technology.

The Tulip Gold Standard Small Volume Set

The Tulip Small Volume reusable set is recommended for facial and hand procedures. The complete set contains our patented SuperLuerLok hub and our Cell-Friendly cannulas to harvest and re-inject adipose cells in a friendlier manner. This set includes a Tumescent Infiltrator for tunneling to simplify the harvesting aspect of the procedure. The Tonnard Harvester is slightly larger to maintain an adequate tissue seal for its 1mm micro-port holes, which are compatible with our three micro injectors:

Note: A Triport Harvester 2.1mm x 20cm or a Carraway Harvester 2.1mm x 20cm can be substituted for the Tonnard Harvester.

Please call 800-325-6526 to request this option when ordering.

1 Tumescent Infiltrator SuperLuerLok 2.1mm x 20cm
1 Tonnard Harvester SuperLuerLok 2.4mm x 20cm
1 Tulip Micro Injector SuperLuerLok 1.2mm x 7cm
1 Tulip Micro Injector SuperLuerLok 0.9mm x 5cm
1 Tulip Micro Injector SuperLuerLok 0.7mm x 4cm
2 Johnnie Loks BD 20cc
1 Decant Stand Luer to Luer
Syringes may be ordered separately

The Tulip Gold Standard Large Volume Set

The Tulip Large Volume reusable set is recommended for torso and gluteal procedures. This is a great starter set that includes the basic cannula sizes for harvesting, re-injecting and contouring. This set includes two Tonnard Harvesters with larger port sizes to maximize efficiency. The larger port size allows for larger aliquot cells associated with torso and buttocks. These port sizes are designed to be compatible with our single port Spoon Tip Injectors.

1 Tumescent Infiltrator SuperLuerLok 2.1mm x 20cm
2 Tonnard Harvester SuperLuerLok 3.0mm x 20cm
1 Spoon Tip Injector SuperLuerLok 1.4mm x 7cm
1 Spoon Tip Injector SuperLuerLok 1.6mm x 9cm
1 Spoon Tip Injector SuperLuerLok 2.1mm x 13cm
1 Spoon Tip Injector SuperLuerLok 3.0mm x 20cm
2 Johnnie Loks BD 20cc or 60cc
1 Anaerobic Transfer Luer to Luer
Syringes may be ordered separately

Visit TulipMedical.com to see more available sets

Tulip’s reusable sets can be customized to meet specific needs. Call 800-325-6526 to request modifications.
The Tulip Machine Assisted MEGA Volume Set

Designed to accommodate machine-assisted harvesting, this Tulip set includes Tulip’s proprietary Tonnard Harvester. This unique atraumatic harvester delivers a smooth consistency of fat ideal for reinjection. The harvester attaches to the Tulip Power Handle for use with external power machines. For decanting and washing of the harvested fat, the Tulip Machine-Assisted Large Volume Fat Transfer Set also includes the LipoSales autoclavable 2000ml canister. After easily transferring the decanted fat into injection syringes through the canister’s transfer port, the CellFriendly Tulip Spoon Tip injectors allow for blunt and rapid precision reinjection.

1 each Tonnard Harvester Power Cannula 3.7 x 25cm
1 each Spoon Tip Injector Super Luer Hub 3.7mm x 20cm
1 each Spoon Tip Injector Super Luer Hub 3.0mm x 20cm
1 each Spoon Tip Injector Super Luer Hub 2.4mm x 15cm
1 each Spoon Tip Injector Super Luer Hub 2.1mm x 15cm
1 each Fat Canister 2000ml
Syringes may be ordered separately

GEMS Procedure Kit
Small Volume Transfer
for Facial and Hand Procedures

The GEMS single-use set for face and hand procedures, the complete solution for a single small volume procedure, is designed to eliminate risk of cross contamination while providing top-of-the-line performance.

Everything you need for one small volume (up to 100cc) transfer procedure in a sterile, disposable kit.
And even better - it's all CellFriendly

1 each Tumescent Infiltrator SuperLuerLok 2.1mm x 20cm
1 each Tonnard Harvester SuperLuerLok 2.4mm x 20cm
1 each Tulip Micro Injector SuperLuerLok 0.7mm x 4cm
1 each Tulip Micro Injector SuperLuerLok 0.9mm x 5cm
1 each Tulip Micro Injector SuperLuerLok 1.4mm x 9cm
2 each Syringe Locks
1 pair Tulip Transparent Transfers
10 each Harvesting Syringes
10 each Injection Syringes

harvesting advanced

Premium Single-Use • CellFriendly™
Tulip CellFriendly™ The Gold Standard in Cannulas

Infiltrators

Tumescent Infiltrator™
Used specifically for the infusion of tumescent solution and for hydraulic dissection. The port configuration allows even distribution of the fluid.

Liposuction Cannulas

Stevens Speed Cannula™
NEW! Exclusively from Tulip - An advanced liposculpture cannula with multiple small ports in a spiral configuration.

Cobra Bibevel™
More aggressive than the Standard, Pyramid or Mercedes, this cannula has a tapered tip with two ports and works effectively within dense fibrous tissue.

Cobra Roud Tip™
Less aggressive than the Cobra Bibevel, this cannula has a rounded tip with two ports and works effectively within dense fibrous tissue.

Standard™
This is the most common cannula design for adipose tissue removal. The single port is located 180 degrees from the thumb rest on the hub.

Pyramid™
This commonly used design has three ports located 180 degrees from the thumb print. It is a slightly more aggressive cannula than the Standard.

Mercedes™
This circumferential three port configuration is effective for multi-plane adipose tissue harvesting.

Harvesters

Tonnard Harvester™
A multiport harvester with 1mm elevated sharp microports. The 12 or 20 port configuration allows for harvesting both on the forward and backward strokes.

Sorenson Harvester™
A multiport harvester with 1mm depressed sharp microports. The 12 or 20 port configuration allows for harvesting both on the forward and backward strokes.

Miller Speed Harvester™
Six port spiral configuration on this CellFriendly liposuction cannula harvests maximum tissue volume in minimal time.

Carraway Harvester™
Spiral three port design is effective for multi-plane addipose tissue harvesting.

TriPort Harvester™
Excellent for harvesting small aliquots of adipose tissue.

Specialty Cannulas

Flap™
The Flap is primarily used as an undermining dissector, and in smaller diameters, for facial tissue removal.

Field Flap™
An elevated leading edge on this cannula is designed to open and expose adipose tissue for more precise suctioning along the mandible and sub-mental areas.

V-Dissector™
This cannula is specifically designed for use in the superficial compartment. The cutting notch is very useful for releasing dense fibrous tissue. Now available portless - see website for details.

Basket Cannula™
The three-port Basket is used in areas with skin irregularities as an equalizer, injector, and suction cannula.

Tulip CellFriendly Instrument Cleaning Brushes™
These reusable brushes are the only brushes specially designed to clean CellFriendly Cannulas. The soft nylon bristles clean the lumen without damage to the CellFriendly surface. Use only Tulip brushes and stylettes on Tulip cannulas to maintain the CellFriendly benefits.
Tulip Micro-Injectors™

Tulip Injector™
Rounded blunt tip design passes through soft tissue easily without the trauma or potential problems of sharp injectors.

Little Injector™
Blunt injector designed for precision delivery of very small aliquots of adipose tissue - especially useful in the periorbital region and the vermilion-skin border of the lips.

Tulip Curved Injectors™
Tulip Medical’s new Curved Injectors are designed especially for fat transfer procedures to the body. Their unique shape mimics the anatomical curvature of the female torso and, thus, easily produces the natural-looking results that patients desire. Tulip’s Curved Injection Cannulas ameliorate the fat transfer process by providing a direct and precise route to the injection site and by lessening the time required to correctly sculpt curves.

Syringe Connection is why Tulip is the “Soft Touch for Soft Tissue™”

Machine Connection

Power Handle
60cc Hub Tulip Cannulas can be attached to our lightweight polymer Power Handle designed for machine liposuction. Shown with a 60cc cannula attached.

Power Cannula
Order Tulip Cannulas and Harvesters as a complete instrument ready to use with an aspiration machine for liposuction and large volume fat harvesting procedures.

Spoon Tip Injector™
Blunt injector designed with a more open port for rapid injection of larger volumes - a torso and buttock workhorse.

Blunt & Sharp Extractor / Injector™
This tip works well for needle extraction of adipose tissue and as a adipose tissue re-injection needle.
Tumescent Infiltrator™
This cannula is used specifically for the infusion of tumescent solution and for hydraulic dissection. The configuration of the ports allows even distribution of the fluid.

Tonnard Harvester™
A multiport harvester with 1mm elevated sharp microports. The 20 port configuration allows for harvesting both on the forward and backward strokes.

TriPort Harvester™
Excellent for harvesting small aliquots of tissue.

Carraway Harvester™
Spiral three port design is effective for multi-plane tissue harvesting.

Tulip Injector™
Rounded blunt tip design passes through soft tissue easily without the trauma or potential problems of sharp injectors.

Spoon Tip Injector™
Blunt injector designed with a more open port for rapid injection of larger volumes - a torso and buttock workhorse.

The Tulip SuperLuerLok™
U.S. Patent Number 6,569,118
Get more security and control. Another advantage only from Tulip!

Universal SuperLuerLok™ Adaptor
Adapts luer lock syringes, stopcocks and valves of any brand for use with Tulip's patented and recommended SuperLuerLok hub.

Tulip's patent pending CellFriendly technology is now available in premium, pre-sterilized, single-use instruments. Tulip GEMS eliminate risk of cross contamination while providing top-of-the-line performance. Tulip GEMS glide easily through tissue and resist clogging. The proprietary lubricious Stealth™ coating truly is CellFriendly. Tulip GEMS – simply the best.
Why Tulip Single-Use Instruments?

See The Difference

Over time reusable cannulas can corrode and become more porous, creating potential harbors for microbial growth. Now with Tulip’s Premium, Single-Use GEMS, related risks of infection and cross-contamination are virtually eliminated - Tulip quality in a single-use device.
Tulip Anaerobic Transfers and Emulsifiers

**Tulip Emulsifier™**
The Tulip Emulsifier standardizes the texture of harvested adipose tissue for easy and smooth subdermal and intradermal injection with micro-injectors.

Two sizes
- 1.0mm
- 1.2mm

**Anaerobic Transfer™**
Anaerobic transfers are used to prepare and transfer extracted tissue for re-injection. The Decant Stand design also allows for a natural gravity decant.

Decant Stands
- 60cc to 60cc
- 60cc to Luer
- Luer to Luer

Anaerobic Transfers
- Luer to Luer

**Tulip Transparent Transfer™**
Tulip’s single-use, pre-sterilized transfers designed for easy, clean, closed-system transportation of adipose tissue between luer lock syringes.

Syringe Decanting and Injection

The Tulip Z Stand - Form Follows Function
No Assembly Required • Easy to Clean • Virtually Indestructible

Please see our website for additional syringe products - TulipMedical.com

Universal Power Injector™
The Power Injector allows the surgeon to re-inject soft tissue through large or small diameter injectors with very little effort and maximum control. The Universal Power Injector will hold a 10cc or a 20cc BD syringe or a 60cc Monoject syringe.

Power and Control
Tulip Power Connections

**Tulip Power Handles™**

60cc Hub Tulip Cannulas can be attached to our lightweight polymer power handle designed for machine liposuction. This perfectly balanced handle combined with our CellFriendly cannula allows for fine liposculpting and soft tissue enhancement. The friction hub grip allows you to quickly change to different cannulas during your procedure. No need to stop and detach the hose and handle, just switch up your sculpting cannulas with a quick twist off and on.

**Tulip Power Cannula™**

Order Tulip Cannulas and Harvesters as a complete instrument ready to use with an aspiration machine for liposuction and large volume fat harvesting procedures. Tulip’s lubricious Cell Friendly instruments can now be ordered configured with a permanent handle and hose barb.

**Power Adaptor™**

The Tulip Power Adaptor modifies the cannula and the syringe for use with an aspirating machine.

- 60cc Monoject
- 35cc Monoject
- 20cc BD
- 20cc Monoject
- 10cc BD
- 10/12cc Monoject

Machine, syringe, or both, Tulip Instruments offer superior results

Tulip Syringe Locks

**JohnnieLok™**
The unique, light-weight JohnnieLok slips onto the collar of the syringe barrel. The plunger is drawn back to the desired cc for precision measurement on the syringe. Then, with a small twist, teeth on the lock bite into the plunger flanges and lock the plunger securely to the barrel holding the syringe under vacuum for precision extraction.

**Available in six popular syringe sizes.**
- 60cc Monoject
- 35cc Monoject
- 20cc BD
- 20cc Monoject
- 10cc BD
- 10/12cc Monoject

**SnapLoks™**
These syringe snap locks fit into the plunger flanges of the syringe. When the plunger is pulled out the lock snaps open on the barrel lip thus holding the syringe under vacuum.

**JohnnieSnap™**
The single-use JohnnieSnap syringe lock is designed to maintain vacuum at variable pressure levels, from low to high. The JohnnieSnap comes in two sizes, 20cc and 60cc, and fits the following syringes:
- 20cc BD Syringes
- 20cc Monoject Syringes
- 60cc BD Syringes
- 60cc Monoject Syringes
