STILLE

Micro Instruments

Solid Performance – Outstanding Precision

STILLE offers the highest quality handmade instruments for the world's best surgeons

The line of STILLE Micro Instruments includes a wide range of stainless steel and titanium patterns. Our instruments provide the surgeon with the fingertip feel, perfect balance and reliability they expect during long and difficult cases. STILLE enhances your investment in quality by providing you with a 30-year instrument warranty.

STILLE MICRO SCISSORS

The STILLE Micro scissors consist of both straight and curved models in different lengths, blade sizes and angles. All models are made with the original STILLE Supercut blades for consistent cutting performance in soft tissue.

Our joint screw design allows for easy removal during instrument service and repair. After service, the instrument will perform with the same feel and reliability you come to expect from a STILLE instrument.

STILLE MICRO FORCEPS

All STILLE Micro Forceps are designed to give the same feel and balance as our standard line of forceps. Our attention to detail by our skilled artisans in Sweden, combines both perfect spring tension and tip alignment for reliable grasping of tissue.

They are available in Titanium or stainless steel that include tying platform, 1x2 teeth, ring tips and DeBakey. The tips are available in stainless steel or STILLE Diamond jaws for added durability.

STILLE MICRO NEEDLE HOLDERS

The STILLE Micro Needle Holders are designed to hold the finest sutures in a tight and secure grip. Only minimal pressure will need to be applied by surgeon's fingers.

All models are made with STILLE Diamond Jaws and the heavier models with TC-inserts. They can be delivered as straight or curved, with or without ratchet and in several different lengths. Regular box lock for 7-0 sutures and finer, Streamline box lock for 5-0 sutures and finer. (heavy models for 2-0 to 4-0).

Satin finish prevents glare, keeping the surgeon's eyes comfortable during long operations

Anatomically adapted to the surgeon's hand

Grooved handle in order to reduce the weight of the instrument

The edges, spring unit, pivot and grip are designed to prevent glove damage

- 10 **Micro Forceps** in Stainless Steel
- 13 **Micro Forceps** in Titanium
- 15 **Micro Needle Holders** in Stainless Steel
- 18 **Micro Needle Holders** in Titanium

STILLE TITANIUM MICRO INSTRUMENTS

Titanium is a non-magnetic metal that offers the surgeon a lighter, stronger instrument alternative. It minimizes the frustration over magnetized needles and is very resistant to corrosion. That provides you with an excellent long-term investment in quality.

STILLE Titanium Instruments come from only the finest, U.S. origin alloy (Ti6Al4V). The end result is improved durability and better fracture toughness than other titanium options.

STILLE Titanium Forceps and Needle Holders are clearly distinguishable by our blue coated round handles. The forceps (except for DeBakey models) and needle holders are all equipped with STILLE Diamond Jaws coating for improved durability and proper gripping of fine sutures.
