

## Pressrelease

2020-02-13

STILLE informs about a Corrective Field Service Upgrade of specific models of the Medstone surgical table. The affected surgical table models are mainly used for procedures where the patient may be overweight and therefore have a maximum weight of 750 lbs. STILLE discovered a potential design weakness during final production testing.

The current Medstone surgical table models have been on the market for over 10 years. STILLE has identified 13 units of the current combination delivered to the end user. All affected customers are informed. To date, no incidents have been reported that have result in serious illness or injuries caused by the Medstone surgical tables 500–1007 and 500–1031, 500-1037 or Medstone surgical tables 500–1001, 500–1002, 500–1003 upgraded with standard top Bariatric 505–1104 or 505–1105. STILLE acquired the Medstone surgical tables range in 2017.

STILLE has reported to the relevant authorities in accordance with current regulations and the cost for the Corrective Field Service Upgrade is not significant.

This information is published to inform about the STILLE product according to the standard process recommended by the authorities.
